DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities:

Appropriate correction is required.

Paragraph [0001] should be updated to reflect the patent status of application 10/036,888 and the abandoned status of application 09/916,886.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3644

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable **over claims 1-9 and 16-24 of U.S. Patent No. 6,625,928.**

Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant independent claims 1 and 13 are encompassed by the conflicting independent claims 1 and 16.

Specifically, the conflicting independent claims recite a decorative growers container having **at least one drain hole and a printed pattern** disposed thereon, whereas the instant independent claims recite a decorative growers container having a decorative pattern and further introduce a drain hole and printed pattern in the succeeding dependent claims.

Common to both the instant and conflicting inventions however, is the non-obvious art feature of providing a sheet of material having an opening therein and disposing the decorative grower's container into the opening to effect a decorative collar about the container, in combination with the remaining cited common features.
